WC MINER

WC MINER BUSD

WC Miner BUSD is a staking concept forked by other staking Defi Projects from across the market with combining the best ideas for growth while still making a massive return on your investment. We started our brand, WC Miner, to create the safest, most profitable, sustainable, Defi Projects in the market.

Daily ROI

Daily ROI will range from 3.5% to 8.5% daily depending on the staking duration with your initial investment. We have added a compound feature as well that will add a new stake once you compound your profits from the original stake. Please reference the chart below. You can Unstake your initial at any time.

DIVIDENDS			
Level 1	Day 1-20	3.5% Daily	20% Unstake Fee
Level 2	Day 20-30	4.5% Daily	18% Unstake Fee
Level 3	Day 30-40	5.5% Daily	15% Unstake Fee
Level 4	Day 40-50	6.5% Daily	12% Unstake Fee
Level 5	Day 50+	8.5% Daily	12% Unstake Fee

Deposits withdraws and fees

We decided to look towards the future and made the decision 75% of all fees will be used towards other asset classes and crypto coins. We will be building a portfolio outside the protocol, during this growth phase we will insure allocate the right amount of capital in each sector before paying out earnings from our investment portfolio into the smart contract. In short, we will create self-sustainability in the short coming months.

Deposits – 10% Fee

Dividend collection – 10% Fee

Compound – 0% Fee

Referrals – 0% Fee

Road Map

WC Miner BUSD is phase 2 of our current ops! As we continue to boost the growth of WC Miner for BUSD, we will slowly begin to launch other miners for all coins! AVAX, BTC, DOGE, MATIC, SOL, ETH... the list goes on. Once we feel comfortable to the point that our BUSD project is stable and sustainable on its own, we will begin moving forward on the next coin.

AUDIT

TBD

Conclusion

WC Miner BUSD will be one of the top players in the Defi marketplace. Offering up to 8.5% daily in a short period of staking BUSD. As we grow so will your profits and creating an investment portfolio outside the protocol will be the first step towards the future for WC Miner and its investors, making our Defi projects self-sustainable for years to come!
